

# Day Bag DB40

This 800 cubic inch capacity bag is perfect for commuting, day trips, or as a supplement to your panniers. Now featuring an internal water bladder pocket for a Platypus drinking system (also available from us).

This unit will fit over the SBWB "WaterBack" water bladder holder. You do NOT need the "WaterBack" to mount the DB40.

## Vision Day Bag

To attach your VISION™ day bag, first slip the top attachment pocket over the back of your seat. Tighten the strap on the inside of the bag until the pocket holds the seat firmly. Thread the bottom flap straps around the seat crossbar and through the elastic straps on the bottom of the bag. Fasten and tighten the buckles, and you are ready to ride.
